-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Borghi et al. (U.S. Patent 6,056,775) in view of Clerc et al. (U.S. Patent 6,860,900).

Borghi et al. disclosed a stent (1) having at one vessel support element (7) and at least one rail element (6, 6s) as is claimed (figures 4a and 4g, column 4 lines 44-47 and 55-58 and column 5 lines 43-63). But Clerc et al. fail to disclosed at least one graft element and the graft element is formed from PTFE.

Clerc et al. teaches a stent-graft (410) for treating branched vessels having a stent (10) and graft (450) formed from PTFE (figure 7 and 11 and column 7 lines 3-54). The advantage of having a graft element and the graft element made from PTFE is the graft prevent restenosis.

Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to use the teaching of Clerc et al. to modify the apparatus Borghi et al. to have at least one graft element and the graft element is formed from PTFE. The motivation for incorporating the feature of Clerc et al. into the apparatus of Borghi et al. is the graft prevent restenosis.

Conclusion

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hieu Phan whose telephone number is 571-272-4757. The examiner can normally be reached on Monday-Friday from 8am-5pm.
